

The Perfect Fit:

To ensure optimum fit, please follow these instructions when measuring your horse for Kensington blankets or sheets.

Using a flexible measuring tape, measure from the centre of the horse's chest, around the widest part of the shoulder, along the barrel, and around the widest part of the hind-quarter to the centre of the rear. The measurement in inches is the size of the blanket.

If your horse measures an odd number please add one inch to the measurement, this will produce the most accurate number for the size of your horse. If measuring for a European cut blanket, please reduce the size of your size selection by one size .
